

Agile with Atlassian Jira

final project

Create a **company-managed** kanban project named **projectfinal** in Jira to use as your team's project board. As the team modifies its agile methodology, you will periodically be given new requirements for the board. Your task is to modify the board accordingly. In the chart below, each version of the board is labelled with the next letter of the alphabet.

The notes/reference column contains notes for more information and references to similar exercises that you have done earlier in the course. Use those exercises to help guide you.

board version	requirements	verification	notes/references
A	<ul style="list-style-type: none"> Create a company-managed kanban project named project final Column names: Backlog, Selected for Development, In Progress, Done 	Create and verify that an issue can move across the board	see Week 1 Lesson 2 lab
B	Limit the In Progress column to 3 items	Verify that 4 items turns the column red	see Week 1 Lesson 5 lab
C	Create a backlog separate from the board	Verify that you can not see the backlog when viewing the board	see Week 1 Lesson 5 lab
D	<ul style="list-style-type: none"> Split the In Progress column to Analyze, Build and Verify columns Limit the Build column to a WIP of 3 items 	Verify that issues can move through the columns as expected	see Week 1 Lesson 5 lab
E	Add a swimlane named Expedite containing issues with priority = High or priority = Highest	<ul style="list-style-type: none"> Set an issue's priority to High and verify that it is in a swimlane Repeat setting the priority to Highest 	<ul style="list-style-type: none"> see Week 3 Lesson 2 lab see Week 3 Lesson 4 lab
F	<ul style="list-style-type: none"> Create an epic named Initial Release Add issues to the epic 	View the epic label for issues on the board	see Week 4 Lesson 1 lab
G	Create a filter named Open IR Epic Issues that searches for issues in the Initial Release epic that are not Done	Verify that only non-done issues of the Initial Release epic are returned	<ul style="list-style-type: none"> see Week 3 Lesson 2 lab see Week 3 Lesson 3 lab This filter shows

			similar information to the epic details
H	<ul style="list-style-type: none"> Move all issues of the Initial Release epic to Done and release version 0.1 	No released issues should appear on the board	see Week 4 Lesson 2 lab
